

EVTVM Society

EVTVM - Endovascular Resuscitation and Trauma Management

The endovascular resuscitation platform

The EVTVM society is a medical-professional organization that aims to share information on advanced methods for bleeding control and endovascular resuscitation, exchange of data, and professional cooperation and education. It is also designed to serve as a professional platform for the multidisciplinary approach. It is a non-profit organization, registered in Sweden, and works in collaboration with the EVTVM program at Örebro University Hospital, the JEVTVM journal and web platform, and some other institutes.

Vision and Mission:

Our mission is to promote optimal treatment and new methods for bleeding control in trauma and non-trauma patients, and state-of-the-art endovascular resuscitation. This will be achieved by a joint international body that will support the following:

- A web-based free platform for EVTVM issues (www.jevtm.com).
- JEVTVM – the Journal of EndoVascular and hybrid Trauma and bleeding Management, which promotes high quality research. It is an open-access peer-reviewed journal.
- The EVTVM round table symposium, which offers a platform for continuous debate and data exchange.
- Educational opportunities in the form of manuals (Top Stent), courses, workshops, and web seminars.
- Promoting open dialogue and cooperation between societies and organizations, and with the industry.
- Promoting new guidelines and recommendations for EVTVM-related issues and protocols.
- Promoting research in EVTVM-related areas, both human and animal.

- Promoting PR for EVTMM issues, grants, and collaboration with industry.
- Encouraging residents and young colleagues to carry out research on EVTMM issues.
- Promoting cooperation and data exchange with other medical instances.

Structure:

- The EVTMM council, led by the society chair will change membership periodically (i.e., after two years). The council aims to have one or two representatives from each participating country and discipline.
- Membership is free at this stage.

The EVTMM society is supported at this stage by Örebro University Hospital in all financial respects (as part of EVTMM research group support). This support has been granted for the forthcoming two years. The main task of the council is to pave the way for the EVTMM venture, and promote the JEVTTM/EVTMM symposium, EVTMM-related courses, cooperation, and free exchange of information.

Members will obtain free information, and access to all JEVTTM material. Members will also be offered a reduced fee for the EVTMM round table symposium. A further benefit of society membership is receipt of regular updates on EVT-related activities, education, and developments. Members will be able to contribute in different ways, and create a professional discussion forum for this new movement. Information will be directed at members via JEVTTM.com and different social media platforms.

Since the society is registered in Sweden, it will follow the rules and guidelines of the Swedish government and the EU. Expansion to other countries is welcome, but should follow our ethical guidelines and the EVTMM society should be named in all documents appropriately.

Call for collaboration:

We call out to physicians with an interest in endovascular resuscitation, trauma and bleeding management. We need the contributions of the medical professionals who want to be a part of our venture. To join, please visit www.jevtm.com and click on “join the EVTm society”.

Tal M. Hörer MD, PhD

Editor-in-chief JEVTM, Head of the EVTm program.
